SUMMARY

I am a computer engineer with more than three years of experience in software development. I have a strong knowledge of modern programming languages such as Javascript, Typescript and Golang. I have extensive front-end and back-end experience and solution-orientated development skills. My habit of constantly reading open source code, blogs and articles allows me to keep up to date with current developments in the industry and keep my knowledge up to date. I want to build the future web and money. For this, I am developing myself on Web3 and Blockchain.

EDUCATION

- Namik Kemal University | **Computer Engineering** 2018/2019
- Kutahya Dumlupinar University | **Computer Engineering** | 3.05/4 2019/2023

WORK EXPERIENCE
